

### Decision Tool -Taking care of your collection

Sini Neuvonen NIUG 8.10.2020

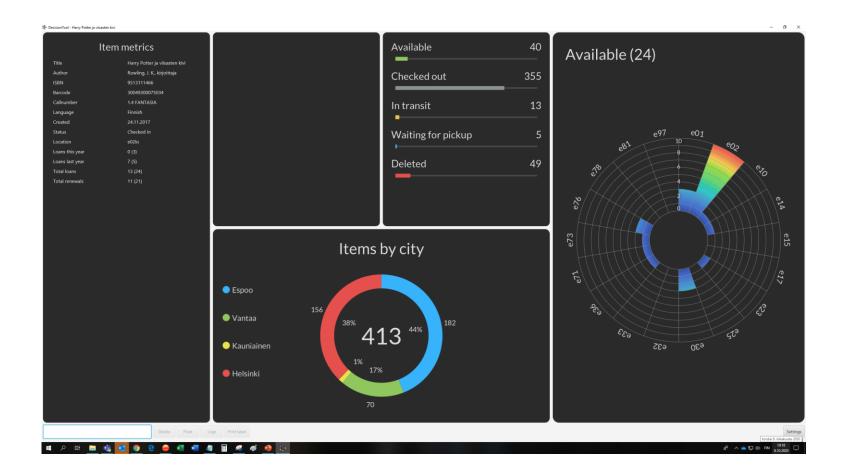

- It is a tool that helps you take care of your collection
- In a floating collection, it is harder to follow what is in your collection in a certain area
- In our experience, smaller libraries tend to overflow with materials, while some larger don't have enough
- It has been really painstaking to go through overflowing shelves and find out where there might be a need for a certain item or should it be weeded

 Plans for the future: ability to change the status, call number and location using these fields

Delete	Float	Logs	Print label

- Deleting the item
- Floating the item
- Viewing logs of what you just did
- Label printing is already in use, future plan is to show a preview before printing

- Open sourcing the code we are figuring out how to do it with the Espoo city policies
- Decision Tool doesn't use Sierra APIs, we have a mirror database in our own server that doesn't have for ex. patron information
- Technical questions email <u>urho.kaipainen@espoo.fi</u>
- User experiences email <u>sini.neuvonen@espoo.fi</u>
